

Position: Senior Data Scientist / Machine Learning Engineer

Company: CloudScale AI Technologies

Location: Remote / Hybrid

ABOUT THE ROLE:

We are seeking a talented Data Scientist to join our enterprise AI engineering team. In this role, you will build production-grade machine learning models and data pipelines.

KEY RESPONSIBILITIES:

- Design, train, and evaluate predictive machine learning models and deep learning architectures.
- Implement NLP and text analysis models to process unstructured enterprise data.
- Build robust data pipelines and perform statistical data analysis on terabyte-scale datasets.
- Deploy and monitor AI services on cloud infrastructure using Docker, Kubernetes, and Amazon Web Services (AWS) or Google Cloud Platform (GCP).
- Work closely with engineering teams in an Agile scrum environment to integrate models into production REST API services.
- Present data-driven insights and interactive dashboards using Power BI or Tableau.

REQUIRED QUALIFICATIONS & SKILLS:

- Bachelor's or Master's degree in Computer Science, Statistics, or related technical field.
- 3+ years of hands-on experience in Python, SQL, and data analysis.
- Strong proficiency in Machine Learning frameworks: Scikit-Learn, PyTorch, or TensorFlow.
- Experience with Natural Language Processing (NLP) or Computer Vision techniques.
- Solid experience with relational databases such as PostgreSQL or MySQL.
- Experience with containerization (Docker, Kubernetes) and CI/CD pipelines.
- Familiarity with cloud environments: Amazon Web Services (AWS) or Microsoft Azure.
- Experience with business intelligence tools: Power BI or Tableau.
- Strong problem solving, communication, and collaboration skills.
